

If anyone has a Photo of Patrick Lawson, please email to: [Indycop999@hotmail.com](mailto:Indycop999@hotmail.com)

**Patrick constructed a good number of model railroads in his time. His final one was in a home that he had lived in for almost one-quarter of a century! That was his masterpiece: The Cascade Subdivision of Canadian Pacific Rail. It took approximately ten years to build it.**

**The layout was satisfying and filled with lessons learned. There is no one who has ever built a model railroad that hasn't experienced many ups and downs. Your modeling improves with practice, patience and perseverance.**

**This layout was built in HO Scale and was about sixteen feet by eighteen feet in size. It was two levels basically following along the walls of a large room.**
